# Fashionable Furniture

THE furniture illustrated herein, and on display at this exposition, was selected from the regular lines of the Nelson-Matter Furniture Company, one of the oldest and largest of the factories that have made Grand Rapids famous in the furniture world. It is not "show pieces," designed for a special purpose, and differs not at all from the ordinary output of the factory. The object is to show that a vast American factory, with its elaborate sub-division of labor, its specialization of skill, the substitution of mechanical for hand labor wherever possible, and the great output, not only materially cheapens the cost of fine furniture, but also lends itself to a superior style of internal as well as external finish in the medium and better grades. In design, material, construction and finish it excels the so-called hand-made furniture. Indeed, it is the combination of original designs, with attentive skill in construction and finish, that has awarded us the superior position in furniture circles.
